WHO’S YOUR DADDY

17th Annual

Shorthorn Bull & Female Sale

THURSDAY, APRIL 2, 2020
1:00PM
SASKATOON LIVESTOCK SALES
Welcome

Welcome to the 17th Annual “Who’s Your Daddy” Shorthorn bull sale. In this catalogue you will find 64 thick, easy fleshing Shorthorn bulls. These bulls represent the top cut from over 400 purebred Shorthorn females that are raised under commercial conditions. They are bred to go out and sire cattle that can survive and produce with a minimum of feed and labor, the two biggest costs facing our industry today.

If you have any questions about the offering or are unable to attend the sale, feel free to contact the sales staff or consignors and we will be happy to assist you. The bulls will be available for viewing Tuesday and Wednesday.

-Bull Sale Consigners

Delivery: Free delivery to central locations within 300 miles of Saskatoon. Delivery over 300 miles at cost. $100 off purchase price of your bull if you haul him home sale day. (Bull must be paid for in full in order to receive the discount).

U.S Buyers: A $300.00 per lot will be applied to your purchase. This will include all necessary vet inspections, health papers, brokerage fees and delivery to Minot, North Dakota or Billings Montana. We will guarantee that your bull will be eligible to export to the USA or we will refund your purchase price. For our American buyers the U.S. dollar enjoys a premium over the Canadian dollar. Exchange rate will be announced sale day.

Buyer Specific Bull Sale Service: If you are unable to attend the sale we would be more than happy to help select a bull to suit your needs. If you are not happy with the bull upon delivery, we’ll load him up and take him home. If you are not happy, we aren’t happy.

Buyers Option: Buyers may leave the bulls at the farm at their own risk until May 1, 2020 at no cost. Bulls left at the farm must be insured.

Insurance: Will be available sale day.

Muridale Shorthorns is located south east of Swift Current, Saskatchewan near a community called Hallonquist. The Muri farm was homesteaded in 1910 and started registering their Shorthorn cattle in 1927. The fifth generation is actively involved in the selection of genetics from proven cow lines that have been part of Muridale Shorthorns from the beginning and develop cattle to fit into today’s needs. We run approximately 150 Purebred Shorthorns and 100 commercial cows. Our commercial cows are mostly Shorthorn cross. We raise our Shorthorns to work in cow calf operations that are commercial cattle oriented. We recognize the value the Shorthorn breed can offer to the beef industry, and the desirable traits that are needed to be selected for that work in our environment: calving ease, wean a heavy calf, no udder problems, and mature to a moderate weight. Our bulls that we developed are selected for these quality traits, and selected from a cow herd that’s easy fleshing, moderate frame, just good functional cows. The bulls we are offering in the Who’s Your Daddy Sale are genotyped and tested for myostatin.

We stand 100% behind our cattle, we believe in keeping our customers happy.

Muridale Swan 54N X - white

**BW: 90  205-Day Wt: 677  365-Day Wt: 1106  F.S. 5.6**

Phantom has stood out since birth. Big barrel, depth of rib, natural thickness, sound feet, the list goes on and on. One thing that sets this bull apart, his pedigree. Out of Muridale Goose 76Y this bull is sure to have the maternal traits every cattle man is searching for. Phantom’s sire is no stranger to this sale, siring greats like Hulk and Rawhide. Phantom is sure to make his own legacy around the world in the Shorthorn breed. Used on purebred cows.

Terms to be announced.

**BW: 71** 205-Day Wt: 547 365-Day Wt: 998  F.S. 6.0

If you’re looking for a heifer bull this could be the one. Sired by Studer’s Die Hard, a bull we bought from Dale Studer in Iowa. Die Hard calves have calved extremely easy on our farm. Hard Core’s mother is a full sister to Muridale Goose 32R and Muridale Goose 76Y who have made names for themselves in the Shorthorn breed. This bull will add some easy calving and maternal traits to your cow herd. Used on commercial heifers last year and should have calves on the ground by sale day.

REFERENCE SIRES

MURIDALE DIMENSION 3D

MURIDALE ROBERT 35U

MURIDALE IRON MAN 4X
Once again, we are bringing you a group of bulls that have been bred to perform on grass in the summer and a moderate growing ration in the winter. These bulls have never been pushed for maximum gain. As calves they ate only grass and their mother’s milk, NO CREEP. After weaning they were brought up slowly to a ration designed with an energy level of 50 Mcal/cwt NEgain (For frame of reference, we feed our heifer calves a ration that has an energy level of 40 Mcal/cwt NEgain and expect them to gain 1.75 pounds per day. Most feedlots in western Canada feed a fattening ration that is 60 Mcal/cwt NEgain). Other than the 3 bulls we showed, these bulls were kept on this ration until the end of March when they were slowly brought down to a low energy ration before being turned onto grass in May. During the summer while grazing grass they received only salt, and mineral supplementation. They did not receive any protein or energy supplements. At the end of October, they were slowly brought up to a ration with an energy level of 52 Mcal/cwt Negain. We are trying to breed cattle that can survive and reproduce with a minimum of labor and feed. All of our bulls are TH free by pedigree and are not carriers of any myostatin variants unless noted in the footnotes.

Videos of the bulls can be seen on our Facebook page: www.facebook.com/saskvalleynorthorns/videos

Note: We will probably be keeping one of these bulls for our own use.

REFERENCE SIRES

SHANNON’S TODAY’S HEADLINE 89C

ACC DELTON 26D
Building Better Beef is what this industry is all about. Here at Bell M Farms, only 20% of our bull calves are retained as bulls. They are selected on size, quality, feet, legs, testicles, color and disposition. These bulls are grown out on a high roughage (straw) grain and a 32% beef supplement mixture along with a limited amount of hay. Remember grown out, not fattened. These bulls will be able to serve a large number of females for you to help Build Better Beef. As with all the bulls born at Bell M Farms #1 you have to be born unassisted to make the first hurdle to keep your nuts. Then we start looking at birth weight (they get weighed with a scale. No tape or eyeballing) structure, horns, color, performance, disposition, etc.

The replacement females we have on offer are from the heart of our heifer pen. They will go on to make excellent females. Building Better Beef is our goal.

-Bell M Farms

Thick, long bodied bull out of the no nonsense Cathy Joyful cow family. He has had that herd bull look since birth. Moneymaker!
An interesting bull here. The Boomer – 18Y combination sure worked well. TM Gus 36S won Denver a few years back. His daughters have been very productive. I would think Zion will carry this on.

If you want to infiltrate some overall size and dimension to your calves, 71G will do just that. The Crossfire bull is in the background of many of our females in the herd. We use a bit of him every year to get some of those females.
REFERENCE SIRES

JSF WALL STREET 70E

BELL M DETAIL 130A
REPLACEMENT FEMALES

We are offering a group of females that are from the heart of the heifer pen. They represent many of our top cow families. In many cases there are either full sisters or maternal sisters in the herd. Take these heifers home and breed them to the bull of your choice and reap for the profits. The delivery program we have in place for the bulls will not be applied to the heifers, but we will assist you with your purchases.

SIMPLIFY YOUR BULL SEARCH, AND IMPROVE YOUR SELECTION, BY PICKING FROM THE BULL PENs OF CANADA’S LARGEST SHORTHORN PRODUCERS.

**Hassle Free Export Program**

When you buy a bull from the Who’s Your Daddy Sale we guarantee that bull is exportable to the US or you get your money back. We will arrange and pay for all vet testing and brokerage fees and deliver your bull to Minot ND or Billings MT. We will also work with you to arrange any further trucking that is needed. There is a $300 surcharge for this service but it guarantees you get your bull with zero headache or inconvenience.

**More for Your Dollar**

At the time of printing United States Dollar hold a 25% premium over the Canadian Dollar

$1000.00 Canadian = $750.00 US

EPDs

**Birth Weight (BW)** At the basic level, birth weight is nothing more than an indicator trait for calving ease, but the emphasis on birth weight can be overdone. Economically, over selecting for low birth weights can take us in the wrong direction; cattle still sell by the pound. Use BW EPD in conjunction with calving ease. Phenotypic traits like length of body, shoulder design, head shape, circumference of bone and even frame score play a significant role in determining birth weights and calving ease.

**Weaning Weights (WW)** Put simply, weaning weight is the ability of a bull’s calf to dry off, stagger to its feet, and grow like mad. Finding a sire with a strong WW that also excels in other economically relevant traits important to your breeding program is a key element to success.

**Yearling Weight (YW)** This trait is economically important since it is more indicative of growth potential through market weights taken early in the animals life. Single trait selection for YW can lead to serious problems that can affect bottom line profit. Mature must be monitored when selecting a bull for performance via YW EPD. Cow maintenance costs, calving difficulty, and even breeding problems can result. YW EPDs can be very influential if you understand your environment conditions or if you are retaining ownership in your calves from birth to slaughter.

**Milk (M)** A bull’s Milk EPD is determined by his daughter’s ability to wean heavier calves than her contemporaries. Just because a cow weans a heavier calf each year does not necessarily mean her Milk EPD should be the highest in the herd. The performance of her calf can also be attributed to the dam’s or sire’s growth genetics or a number of environmental factors. Milk EPDs can be too high for your environmental conditions especially in severe environmental conditions and can have a negative impact on rebreeding rates.

$Value Indexes

**$ CEZ – ($ Calving Ease)** This index assumes a bull will only be mated to heifers, not cows. The potential profitability of the sire is measured by the incidence of live calves at birth. Moderate mature size is also emphasized in the index, but performance is not a priority. This index is also a good measure of Shorthorn females’ ability to produce calving ease sires. Overemphasis of $CEZ may cause unwanted depression of weaning and yearling performance

**$BMI – ($ British Maternal Index)** As the name implies, this multi-trait selection index attempts to measure a bull’s potential profitability when complimenting the British cow base (Angus, Red Angus, Hereford, etc.). Shorthorn females can likewise be gauged at adding value to British or British-composite bulls of other breeds. A balance of growth and carcass traits is desired with a strong maternal component aimed at optimum reproductive efficiency and cow longevity.

**$F – ($ Feedlot)** Similar to a Terminal Sire scenario, $Feedlot places strong emphasis on growth and carcass traits. This multi-trait index assumes the sire will be mated to a mix of heifers and cows and attempts to measure profitability when progeny are sold on the fed market. On the female side, mature size should be monitored closely when selecting for $F. Over-selection may cause detrimental harm to longevity, reproductive efficiency, and fleshing ability.
Ultrasound Definitions

Ribeye Area (REA) Area of the longissimus muscle, measured in square inches. The trait is moderately to highly heritable and gives an indication of overall carcass muscling.

Fat Thickness (FT) An external fat measurement taken between the 12th and 13th ribs, measured in inches.

Rump Fat (RF) An external measurement taken between the hooks and pins, measured in inches. The rump fat and the rib fat measurements are used to determine the overall external body fat.

Intramuscular Fat (%IMF) Percentage of fat in the ribeye area muscle (similar to marbling). The field technician collects four images and the values generated by the interpreting software are averaged for an overall %IMF. Marbling directly contributes to beef palatability.

Lean Yield (LY) Carcass yield is expressed as the dressing percentage.

Genomic-enhanced EPD (GE-EPD) are important because they utilize genomic test results in addition to pedigree, performance and progeny data for increased reliability of an animal’s EPD.

- Denotes top 20% of Shorthorn breed EPD’s EPD’s are as of February 26, 2020
Terms & Conditions

Location: The sale will be held at Saskatoon Livestock Sales (5 miles west of Saskatoon on Hwy 14).

Date & Time: Thursday April 2, 2020

Air Travel: Saskatoon Airport is serviced by all major airlines, check with your travel agent for further details. We will be happy to look after you but please give us sufficient time if you require assistance.

Sale Day Phone: (306) 382-8088

Terms: Terms of the sale are cash or cheque, payable at par at the sale location. The right of property shall not pass until after settlement has been made; no invoicing on buyers in attendance, unless previous arrangements have been made. Every animal sells to the highest bidder and in cases of disputes, the auctioneer’s decision will be final. Announcements from the auction block will take precedence over the information in the catalogue. All monies are in Canadian funds.

Mail, Phone or Wire Bids: Bidders unable to attend the sale may phone, wire or mail their bids and instructions to the sale manager, auctioneer or special representatives. Bids must be received in sufficient time prior to the sale.

Breeding Information: All cattle of breeding age are guaranteed to be breeders. All calfhood vaccinates are noted in the catalogue. Any export tests will be arranged after the sale, at the seller’s expense. The standard guarantee as endorsed by the Canadian Shorthorn Association will apply.

TH Status: All sale lots have been tested and are TH Free or declared TH Free by pedigree.

Pedigrees: The Canadian Shorthorn Association certificate of registration will be furnished with each animal sold, including calves by side of dam, duly transferred to the purchaser after payment has been made. Proper instructions must be provided at the conclusion of the sale. Extensions granted on order bids only. Costs incurred due to incorrect transfer will be borne by the purchaser.

Insurance: Agents will be in attendance in insure your purchases. We strongly recommend that insurance is purchased for full value.

Delivery: Every assistance will be given in arranging the shipping and delivery of your purchases. Each animal becomes the risk of the purchaser as soon as sold.

Errors: All announcements at sale time, written or oral, supersede any written material in the catalogue.

Liabilities: Who’s Your Daddy, their consignors, sale staff and representatives accept no responsibility for any accidents that occur. All persons attend the sale at their own risk.

JOIN US FOR LUNCH PRIOR TO THE SALE.
WE WOULD LIKE TO THANK ALL OUR BIDDERS AND BUYERS FOR THEIR SUPPORT.
Support the Canadian Junior Shorthorn Association

Royce Moellenbeck will be at the sale selling raffle tickets on a ¼ Beef and Shorthorn Steak Knives and Cutting Board. $10 each or 3 for $20
